Development Experience

Southern Careers Institute - Lead JavaScript Bootcamp Instructor

Developed the syllabus and integrated the curriculum within the school's framework. The Bootcamp was JavaScript focused - TypeScript, Angular, Ionic, Mongo, and Node/Express. As part of my duties I also helped develop a website for the school.

2016 SXSW Music Hackathon Championship

This was an intense 24 hour coding event at the Hilton in downtown Austin. Developed the server side application program interface (API).

Code Across 2016

This was an intense day long civic coding event at St.Edward's University in Austin, TX.

Open Austin

A civic coding group that focuses on solving city problems with technology.

Lowe's Digital Challenge 2016

This was a weekend coding event at Capital Factory in Austin, TX. Worked on a team that developed a DYI application.

Web Development Immersive Student, General Assembly

12 week programming bootcamp focused on programming fundamentals, front end and back end web development, problem solving techniques and team collaboration.
